LDAPSoft AD Browser Crack Free

LDAPSoft AD Browser is a simple and reliable tool that allows you to easily access the Active Directory in a network. The program is designed to provide you with a read-only access to the Active Directory or a local or remote server. Effortless installation and usage LDAPSoft AD Browser takes a few seconds to install and allows you to easily configure the access to the network's Active Directory. You can view all the entries in the directory, view available attributes or run SQL-LDAP queries. It supports both V2 and V3 LDAP directories. The program can be installed both on local machines and on Domain Controller stations, plus it enables you to set the desired level of access security. You can create a connection, by specifying the hostname, desired port, SSL and the authentication details. The username and password can be inserted in the dedicated fields, to facilitate the connection start-up. The program allows you to manage both server and client certificates, plus set trusted certificates and keystores. Access and manage Active Directory contents LDAPSoft AD Browser features an intuitive interface, which allows you to explore the sub-directories of the AD, as well as view all the attributes and assigned values. For instance, you can easily manage People or Groups, in a given network. The tool displays the attributes of each object: classes and domain components, along with the assigned values, size and type. The Schema View reveals classes, types, rules, syntax and relevant metadata regarding each Active Directory. The SQL tab allows you to easily perform queries: you may select the command, the linker and source, then view the result. Support for several connections LDAPSoft AD Browser allows you to open each connection in a separate tab. You may activate several connections at the same time and manage them alternatively, by switching between tabs. The tool also integrates powerful searching engines, which allow you to find attributes in the Active Directory list, as well as pieces of text. Other Features: Search AD for user, group and computer objects: full-text search and advanced object filtering. Check AD for user and group existence: user accounts and groups can be checked from a list and from a single object. LDAPSoft AD Browser is a simple and reliable tool that allows you to easily access the Active Directory in a network. The program is designed to provide you with a read-only access to

LDAPSoft AD Browser
